ICE & WATER RESCUE EQUIPMENT

Proven Safety Innovations for Rescuers Nationwide

Table of Contents

MARSARS
WATER RESCUE SYSTEMS

MARSARS Water Rescue Systems has proven to be the Most Advantageous Surface Based Rapid Rescue / Recovery System on the market for decades.

MARSARS offers the necessary rescue & recovery products for water and ice incidents based on the water rescue advantage of **Reach, Throw, Row, Go.**

We go further to offer products to not only save a victim, but to keep the Rescuer safe with **Rescuer PPE, Gear & Accessories** as well as **Patient Care.**

To easily navigate this catalog, it is organized by **Reach, Throw, Row, Go, Rescuer PPE, Gear & Accessories, Patient Care and, Ocean categories.**

MARSARS Water Rescue Systems was acquired by Rescue Products International and relocated to New Jersey in 2023. At Rescue Products International, RPI, we strive to continue providing only the best products and services to all of the new and existing MARSARS customers.

RPI promises to keep the MARSARS name, products, and services the same, with the exception to change only with forward progress, with newly developed and tested trainings, when improving standards for safety, and technological advancements of equipment and products.

Reach

Reach Pole Kits

MARSARS
WATER RESCUE SYSTEMS

For safer distance ice- or water-rescue response, first responders and emergency service personnel have more options with MARSARS Reach Pole Kits. The Surface-based Rapid Rescue/Recovery Systems were developed with the idea that we need to find ways to deliver first response to drowning victims in the quickest, safest, most efficient manner possible.

With numerous departments facing budget cuts, MARSARS is now offering three reach pole kits with varying numbers of extensions. All reach pole adapters are now sold separately, so you can create your own kit that fits your Department's needs.

Reach Pole System 1 (RPK1)

Includes: Wooden reach pole with buoyant handle, 1 68" metal pole extension, and storage bag

Reach Pole System 2 (RPK2)

Includes: Wooden reach pole with buoyant handle, 2 86" metal pole extensions, and storage bag

Reach Pole System 3 (RPK3)

Includes: Wooden reach pole with buoyant handle, 3 86" metal pole extensions, and storage bag

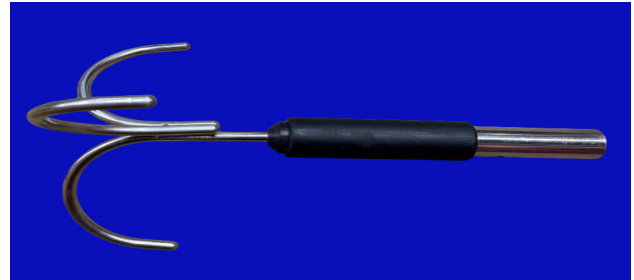

Grapnel Adapter (AG)

Designed specifically for land or boat-based underwater body recovery.

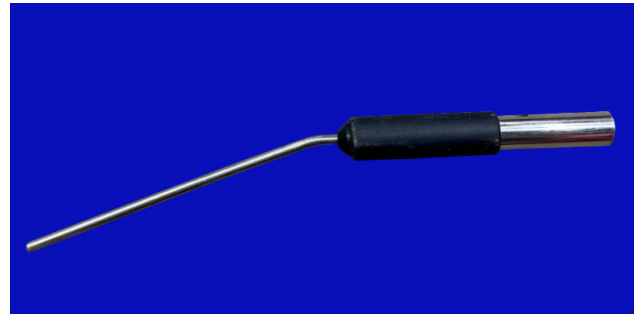

- Stout stainless steel tool for body recovery.
- Large blunt tines to snag a submerged victim with minimal risk of puncture.

Rescue Sling Adapter (ARS)

For child or side-by-side multi-victims.

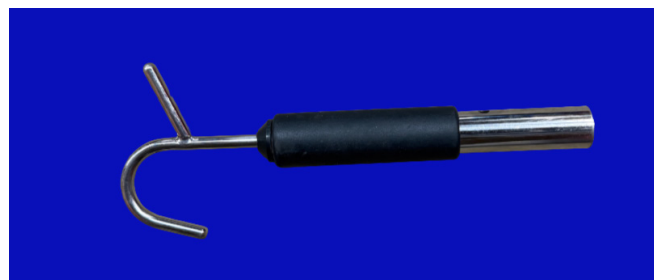

From a safer distance, this adapter enables ice rescuers to outfit a victim with independent positive buoyancy.

Boat Hook Adapter (ABH)

The “boat hook” is long recognized as an essential tool for safer boat operations.

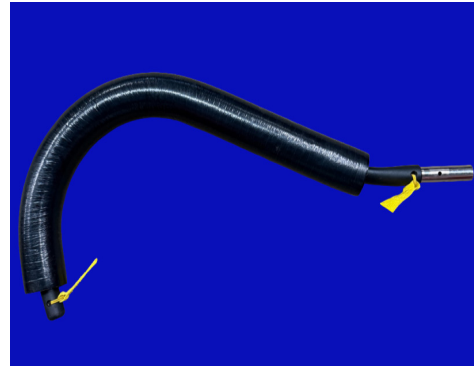

- The grab of hook is used to pull boat to safety.
- Use the spur to fend boat away from danger.

Animal Rescue Adapter Kit (AARK)

This includes the 110' Pet rescue lasso and the shepherds crook adapter so the rescuer can position a safe distance from the animal.

110' Pet Rescue Lasso

Pre-Rigged Weighted Lasso Loop of the lasso is placed under the yellow pull tab on the Shepherds Crook

Shepherds Crook Adapter

Boat Adapter Kit (ABK) **To be discontinued once out of stock*

The Spiral Adapter and Tow line hook with a reach pole can attach or detach a connection point on the hull of a boat without the risk of falling overboard.

- To rig for towing, the Spiral Adapter equipped Boat Pole is readied.
- Tow line hook is opened by hand and connected to end of Tow Line's eye.
- Fairlead tow line through the center of Spiral Adapter.
- Pull towline end thru adapter until hook's spur and metal adapter make contact.
- Hook will now remotely open or close the tow line hook gate as towline is pulled or slacked.

Spiral Adapter

Tow Line Hook

Throw Throw Bags

MARSARS
WATER RESCUE SYSTEMS

Second Chance Throw Bag

Lengths Available:

- | | |
|-----------|-------------|
| 50' (B50) | 90' (B90) |
| 75' (B75) | 110' (B110) |

Designed for full-distance first, and if you miss, second throws within 20 seconds.

- 50' to 90' bags feature 1800 lbs. BS 9mm
- 110' bag
- 1500 lbs. BS 7mm polypropylene Kernmantle
- Mesh bottom minimizes bucketing
- Wiffle ball improves throw distance and release

Instructions for full distance first and second throw:

Figure 1. You need to develop hand/eye coordination

Figure 2. Cast unopened bag back and forth

Figure 3. Remove and hold ball in weak hand

Figure 4. Holding ball - cast bag

Figure 5. Aim to place thrown line within arm's reach

Figure 6. If you miss; (if you make it, skip to **Figure 14**)

Figure 7. With dominate hand make V with middle and index fingers

Figure 8. Place and hold barrel knot between both finger knuckles. Ball is now suspended from dominate hand

Figure 9. Retrieve and place each coil atop opened dominate hand

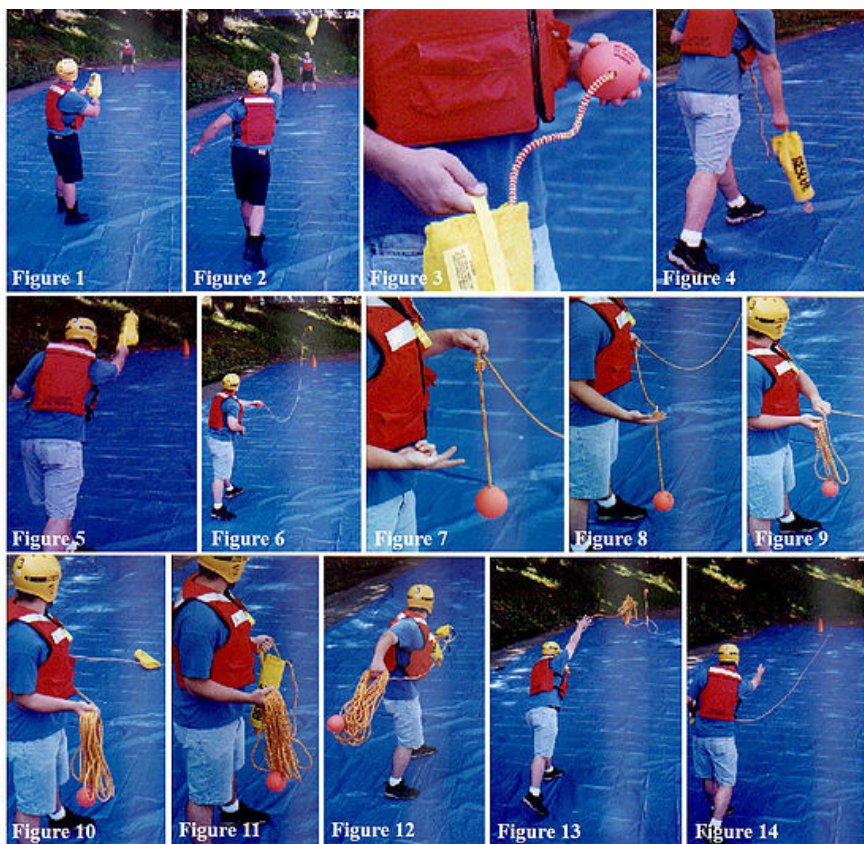

Figure 10. Make sure no coil is LOWER than ball

Figure 11. With empty bag retrieved

Figure 12. Cast coiled heaving line

Figure 13. Underarm casting method works best

Figure 14. A well-thrown line should land full distance within arm's reach

150' Rescue Long Throw (B150LT)

- Doubles your throwing reach
- Used as a messenger to advance a heavier line, PFDs, or a buoyant device
- 2,200 lbs. strength Spectra rope

150' Rescue Long Throw (B150LT)

- Doubles your throwing reach
- Used as a messenger to advance a heavier line, PFDs, or a buoyant device
- 2,200 lbs. strength Spectra rope

Rescue Heaving Line

75' Line (B75HL)

100' Line (B100HL)

- 1800 lb. strength Buoyant 3/8 diameter line
- Multi-filament polypropylene construction
- Soft vinyl ball

75' Swift Water Rescue Throw Bag (RPI75)

Our RPI 75' Swift Water Rescue Throw Bag is built to meet NFPA standards for swiftwater rescue and is made and assembled in the USA by people who understand what's at stake. Why does NFPA compliance matter? Because it ensures your equipment meets the highest safety and performance standards—when seconds count, you need gear you can trust.

Each bag includes:

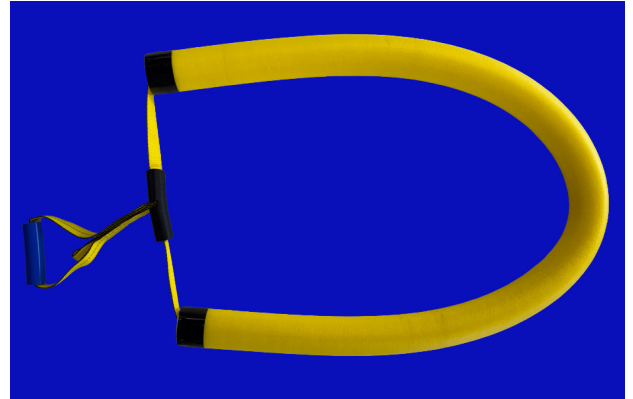

- 75 feet of 3/8" Grabline Yellow Rope — built for rugged use through branches, vehicles, and unexpected obstructions in the water
- 5.75" diameter, 1" thick foam with a 0.5" center hole for flotation
- Custom-designed throw bag for durability and ease of deployment
- Glow Stick Holder for nighttime operations

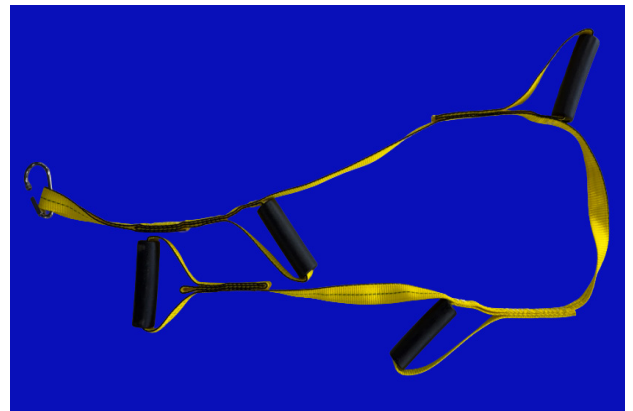

Man-Overboard Rescue Sling (MORS)

This boat-based recovery device is designed for the vertical hoisting of an uninjured victim from water.

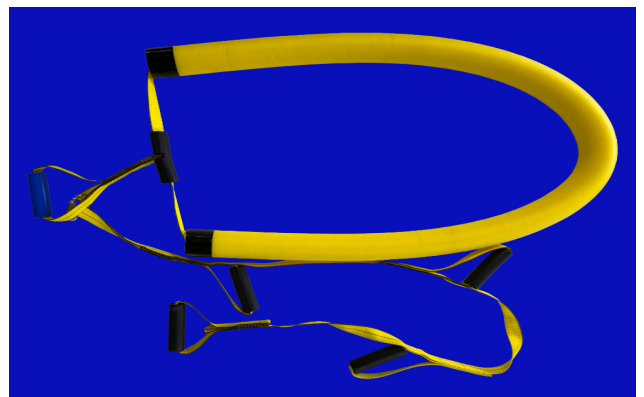

Man-Overboard Hoisting Adapter (MOHA)

6' length hoisting adapters are available for greater hoisting height.

Man-Overboard Rescue Sling Kit (MOK)

This kit includes both the Man-Overboard Sling and the Hoisting Adapter

Body Recovery Net (BRN)

Most recovery nets are made of buoyant polypropylene fiber that floats. Take it from your fellow public safety folks that found it's not fun trying to sink a buoyant net beneath a bloated body. MARSARS high-quality recovery net features:

- Hooks on storage case for hull attachment
- Non-buoyant polyester net construction
- Ballasted to sink net
- Buoyant outer boom keeps submerged "U" shaped net afloat

Body Recovery Bag (BRB)

The Body Recovery Bag is designed for reliable, professional recovery operations. Its durable poly mesh construction allows effective fluid drainage while still containing trace evidence. Measuring 7 feet in overall length, the bag features a full-length entry zipper for ease of use and six reinforced carry handles for secure, balanced transport. Built for strength, functionality, and operational efficiency in demanding conditions.

Underwater Body Recovery Drag (UWBD)

MARSARS offers this high-quality "Made in USA" recovery device that features:

- Stainless-steel rod construction
- Quick assembly
- 46" sweep width, 11.5" hook spacing
- Storage container

MARSARS

Ice Rescue Sled Kits

REACHING RESCUE FROM A SAFER DISTANCE BY SLED

In 2004, the U.S. Coast Guard modernized their ice rescue program. With a primary goal of rescuer's safety, the MARSARS Ice Rescue Safety Shuttle Sled (IRSS) was selected as the Coast Guard's ice rescue device of choice. This sled is now distributed worldwide. We believe the ease of extracting the patient and rescuer safety has been the primary reason for its popularity. The MARSARS Ice Rescue Sled kit includes: IRSS Sled, buoyant Cold Water Rescue Sling, and your choice of 300', 600', or 900' Ice Rescue Reel.

A seed change for ice rescuer's safety

In this high-risk, low-incident environment, the MARSARS Ice Rescue Sled (IRSS Sled) is the first ice rescue device designed to gently extract the victim from a safer distance. As first responders, we must be mindful of the rescue dictum: Self-Rescue, Reach, Throw, Row, Go. The self-rescue, reaching phase of this principle has been incorporated into the design of this unique mitigating device for high-risk situations.

Ice Rescue Safety Sled Features

SAFER DISTANCE ICE RESCUE

Many consider this a unique rescue device, used from a safer distance. This real game changer minimizes the risk of injury to the patient and to the rescuer from injury or viral exposure.

- Initially, a minimum of two first responders are needed for rescue
- All MARSARS IRSS sled kits are one-person portable
- The sled is pre-rigged, ready for instant use within seconds
- Only one outbound ice rescue technician is required
- On-scene, the rescuer remains a safe, one sled-length away from the victim
- Most conscious and alert victims can insert their forearms through the sled's forearm sling
- For size-up, the victim is asked to lift and lower one arm. If conscious and alert...
- Empty sled is extended as a "REACHING DEVICE" for the victim's "SELF-RESCUE ATTEMPT"
- Only one shore-based responder is needed to extricate the patient
- IRSS Sled can extricate two patients at one time

Ice Rescue Safety Sled Kit (IRSS)

Used nationwide by the U.S. Coast Guard, this sled was purpose-built to save lives from a safer distance. Used properly, the rescuer stops a sled length away, dismounts, and extends the empty sled for the victim's self-rescue attempt. With the forearm through the orange-colored sling, the patient is gently hauled aboard by shore-based line tender(s). If semi- or unconscious, the patient is placed in a buoyant sling, connected to the sled's 4:1 ratio haul system, and gently pulled aboard. Sled provides shielding for both the patient and the rescuer.

All kits includes: 1 Sled, 1 buoyant Cold Water Sling, and 1 Ice Rescue Reel.

IRSS Kit Options:

- IRSS Kit A: 1 IRSS Sled, **300' Reel** & 1 Sling
- IRSS Kit B: 1 IRSS Sled, **600' Reel** & 1 Sling
- IRSS Kit C: 1 IRSS Sled, **900' Reel** & 1 Sling

Ice Rescue Extrication Sled Kit (IRS)

The original tough 6' long x 24' wide plastic sled is designed to disperse the outbound rescuer's weight. On scene, the sled is first extended for the victim's self-rescue attempt. If weakened, the patient is loaded into a buoyant sling and placed aboard. During haul back, the sled protects both the patient's and the rescuer's bodies from injury

All kits includes: 1 Sled, 1 buoyant Cold Water Sling, and 1 Ice Rescue Reel.

IRSS Kit Options:

- IRS Kit A: 1 IRS Sled, **300' Reel** & 1 Sling
- IRS Kit B: 1 IRS Sled, **600' Reel** & 1 Sling
- IRS Kit C: 1 IRS Sled, **900' Reel** & 1 Sling

Cold Water Rescue Sling (CWRS)

Our Cold Water Rescue Sling is an essential “Rescue Flotation Device” needed outfit a victim with independent positive buoyancy.

- RPG Sling increases rescuer’s reach by 33”
- Provides approximately 16 lbs. of buoyancy

MARSARS Ice Rescue Tether Reels with Anchor Kit

Come rescue-ready with a buoyant, pre-rigged rope line, carabiner, and float. For on-ice safety, all MARSARS reels float with or without rope. Non-locking carabiners are provided for escape from life-threatening situations. Yellow floats are installed to prevent tethers from sinking when disconnected. We include the versatile Land/Ice Based Anchor Kit (6’ endless sling/carabiner/ice screw).

Hollow-braided “B” line reels offer strengths of 3,500 lbs. with a 3/8” diameter. (Required for sled kits)

Reel Options:

- T300 IRR B: 300’ Ice Rescue Reel
- T600 IRR B: 600’ Ice Rescue Reel
- T900 IRR B: 900’ Ice Rescue Reel

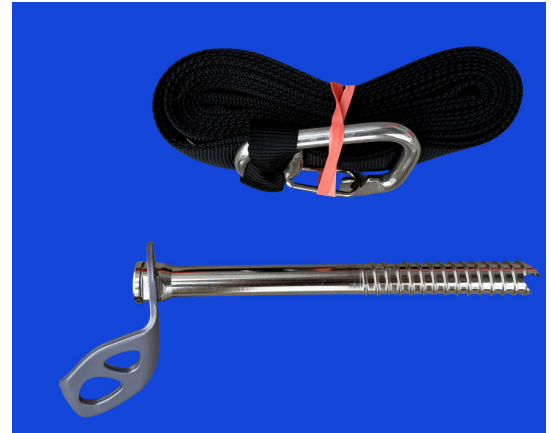

Ice Anchor Kit (AK22)

The versatile Land/Ice Based Anchor Kit

- 6' endless sling
 - Carabineer
- 22cm ice screw

Ice Anchor Screw (A22)

This is a replacement 22cm ice screw ONLY for any of our anchor kits

Personal Marker Light (PML)

When two teams are deployed at night, to avoid confusion, the base of the tether rope bag and the top of the tether reels hold colored identity lights.

They are military-grade lights & are available in red, yellow, green, or blue.

Ice Rescue Tether Bag with Anchor Kit

Ready for rescue, our high-quality MARSARS 200' or 300' Ice Rescue Tether kits offer the following features: pre-rigged with a stainless-steel carabiner and rope thimbles. The yellow float prevents the disconnected tether from sinking. We include the versatile Land/Ice Based Anchor Kit (6' endless sling/carabiner/ice screw).

200' Ice Rescue Tether Bag with Anchor Kit (T200 IRB AK)

300' Ice Rescue Tether Bag with Anchor Kit (T300 IRB AK)

Ice Rescue Response Kits

The MARSARS Ice Rescue Response Kits are expertly crafted, comprehensive solutions designed to equip first responders with the essential tools needed to operate safely and efficiently in ice-water rescue situations. Each kit is meticulously organized to facilitate rapid deployment, ensure responder safety, and enhance victim rescue effectiveness, offering tailored options to meet the diverse needs of rescuers.

Ice Rescue Response Kit A

Please specify which Ice Suit and Helmet you would like included with your kit

Includes:

- 1- Choice of either Mustang Ice Commander Rescue Suit (IC9001), or First Watch Ice Rescue Suit (RS-1000)
- 1-Choice of either Team Wendy SAR Backcountry Helmet, Color Red, w/Rails or First Watch Helmet, w/Rails
- 1- 80-VIZZ-II-MPLS-BK Princeton Tec VIZZ II MPLS Headlamp,
- 1- Personal Market Light for Helmet
- 1- Set Ice Awls
- 1- 200' Ice Rescue Tether w/Ice Anchor Kit,
- 1- Cold Water Rescue Sling,
- 1- Response Bag,
- 1- Set Anti-Slip Soles,
- 1- 110' Second-Chance Rescue Throw Bag

Aqua Lung Fins are no longer included with this kit.

Ice Rescue Engine Company Response Kits

Please specify which Ice Suit and Helmet you would like included with your kit

Includes:

- 2- Choice of either Mustang Ice Commander Rescue Suit (IC9001), or First Watch Ice Rescue Suit (RS-1000)
- 2-Choice of either Team Wendy SAR Backcountry Helmet, Color Red, w/Rails or First Watch Helmet, w/Rails
- 2- 80-VIZZ-II-MPLS-BK Princeton Tec VIZZ II MPLS Headlamp
- 2- Personal Market Light for Helmet
- 2- Sets of Ice Awls
- 2- 200' Ice Rescue Tether w/Ice Anchor Kit
- 2- Cold Water Rescue Sling
- 2- Response Bag
- 2- Set Anti-Slip Soles
- 1- 110' Second-Chance Rescue Throw Bag
- 1- Mustang Rescue Stick MRD100-0-0-101

Aqua Lung Fins are no longer included with this kit.

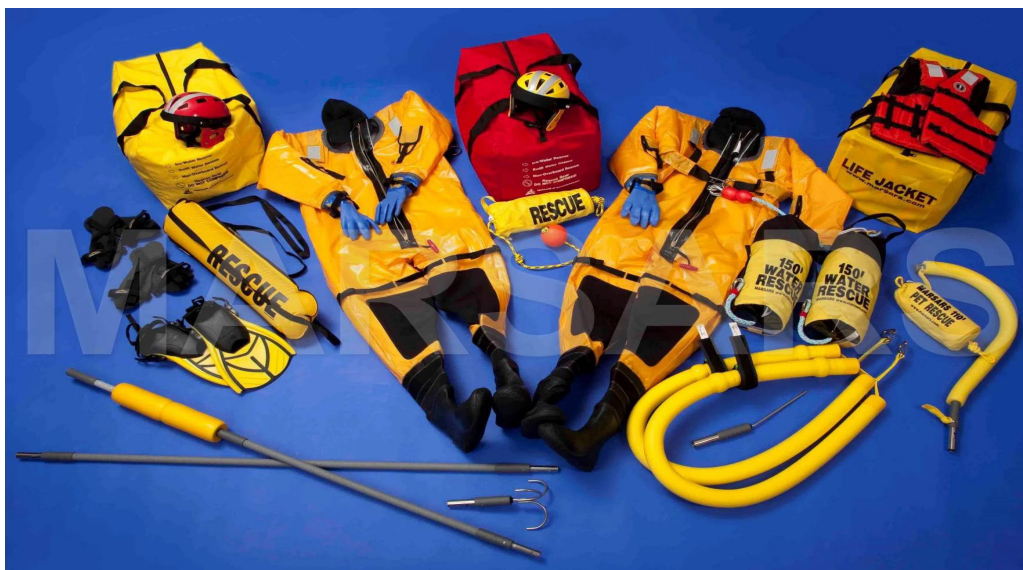

Ice Rescue Truck Company Response Kits

Please specify which Ice Suit and Helmet you would like included with your kit

Includes:

- 2- Choice of either Mustang Ice Commander Rescue Suit (IC9001), or First Watch Ice Rescue Suit (RS-1000)
- 2-Choice of either Team Wendy SAR Backcountry Helmet, Color Red, w/Rails or First Watch Helmet, w/Rails
- 2- 80-VIZZ-II-MPLS-BK Princeton Tec VIZZ II MPLS Headlamp
- 2- Personal Market Light for Helmet
- 2- Sets of Ice Awls
- 2- 200' Ice Rescue Tether w/Ice Anchor Kit
- 2- Cold Water Rescue Sling
- 2- Response Bag
- 2- Set Anti-Slip Soles
- 1- 110' Second-Chance Rescue Throw Bag
- 1- Mustang Rescue Stick MRD100-0-0-101
- 4- PFDs for shore-based rescuers,
- 1- PFD Storage Bag,
- 1- 110' Pet rescue rope and lasso and Shepherds Crook (AARK),
- 1- Reach pole handle and pole extension (RPK1), and
- 1- Grapnel adapter (AG).

Aqua Lung Fins are no longer included with this kit.

Mustang Ice Commander Suit (IC9001)

The Mustang Ice Commander provides flotation and insulation, and a snap-in buoyancy liner allows users to immerse themselves in icy cold water for long periods and maintain mental and physical capabilities.

Features:

- Adult Universal for Heights - 4'11" to 6'6" (150 to 200 cm)
- Heavy-duty zipper - flexible full-length zipper provides a water-tight seal
- High-performance urethane-coated nylon exterior color Gold makes cleaning and repairs easier
- Safety harness - the integral self-adjusting safety harness
- Ergonomic ice awl pockets - sleeve pockets customized to attach and stow ice awls (ice awls not included)
- Detachable inner buoyancy liner, constructed of closed-cell AirSoft foam for maximum flotation and thermal insulation

First Watch Ice Suit (RS-1000)

Designed for cold-water and ice rescue operations. This universal fitting suit (Built to fit 5'0" to 6'4") is made of a Hi-Vis Yellow, rugged, high-tensile nylon shell with a soft, easy-to-don liner.

Features:

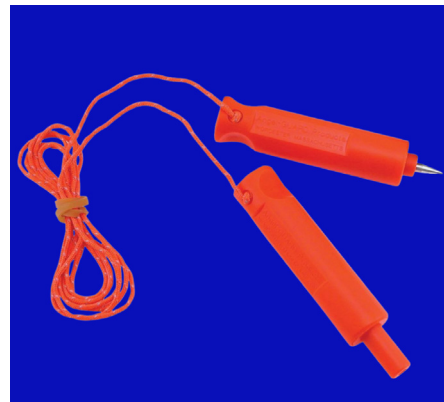

- Rugged Elbow and Knee Patches
- Dual Ice Pick Pockets
- Removable Harness System
- Boots fit up to size US size 12
- Protective Center Zipper Flap
- Internal Suspenders
- Registered Serial Number
- 3" x 11" Velcro Patch
- Stow Bag with Mesh Accessory Pocket

Ice Awls (IA)

MARSARS Ice Awls (Basic) - In rescue, Ice Awls are essential tools that enable rescuers to advance towards the incident. Constructed of a plastic body with a metal nail. Made in USA

Ice Awls w/case (IAWC)

MARSARS Ice Awls (Basic) with Wrist Case Worn over the suit's sleeve like a wristwatch. Immediate accessibility, affixed atop the forearm of outerwear. Black Cordura case construction with hook-and-loop closure. Made in USA

Ice Awls w/ Rescue Grip (IARG)

MARSARS Ice Awls with Rescue Grip

Rubber coated ice awls with attached lanyard.
Made in USA

Rescue Carabiner (IRC)

Non-locking Rescue Carabiner that opens when frozen, employing a torsion spring that minimizes the risk of accidental disconnection. Stainless steel construction. Made in USA

Pair of anti-slip soles (SAS)

(Sizes: L and XL) (Three Straps). Provides assured traction, Vibram rubber soles are fastened by Velcro straps. Replaceable case-hardened steel cleats with Chevron tread soles. MADE IN USA

Hypothermic Stabilizer Bag (HSB)

MARSARS Hypothermic Stabilizer Bag:
Thick polyester pile liner and six carry handles. Snug fit for full body contact. Full CPR accessibility and 360° access. Double-zipped for less invasive access. Compressible storage bag included. MADE IN USA

Compressible Storage Bag (HSBCB)

MARSARS Compressible Storage Bag for the Hypothermic Stabilizer Bag. Compressible Carry Bag. Constructed of nylon fabric with a plastic fastener. MADE IN USA

Hypothermic Truncal Rewarming Kit (HTR)

Designed to treat a cold, traumatized patient (mild to moderate hypothermia) with active warming of the patient's upper trunk. Essentially, this kit is used to heat the heart. In use, the heater pad is centered under the back, beneath the heart. Universal size offers a range of use from a child to an XXXL adult.

This reusable heat kit consists of:

- One, long 8"x 44" length heating pad
- The pad is covered and Velcro-covered web straps are included to prevent movement.

Activating the reusable heating pads starts an instant crystallization process that produces up to 130° F heat within seconds. To prevent blistering, heaters are covered to reduce the temperature.

The heat packs in this kit are the only reusable, medical-grade heat packs backed by a lifetime warranty against manufacturing defects.

MARSARS Ocean Rescue Equipmet

These products are not exclusive to Ocean rescue but can be used for Ocean/Beach/Surf, Lake, Pond, and Pool rescues.

600' Ocean Rescue Tether Bag T600 ORB

- Mesh bag construction
- Shoulder carry strap
- To add length, bottom end of line is detachable
- Buoyant shoulder strap
- The hand-over-hand repack method assures tangle-free line deployment

600' Ocean Rescue Tether Reel (T600ORR) 800' Ocean Rescue Tether Reel (T800ORR)

- An ideal multi-victim rescue device
- Less time needed for rescue
- Minimizes rescue swimmer's fatigue
- Quick put-up
- Tangle-free line deployment
- Includes "Rescue Hand Signals"
- Shoulder Carry Strap provides mobility
- This buoyant reel features foam-filled shoulder strap, 1/4" - 800- pound strength line, swivel hook with float

400' Ocean Tether Bucket (T400 ORJB)

- Easy to grasp grab handles
- Neon Orange colored, 1/4" diameter buoyant line tether
- Tangle-free line deployment
- Bucket's cover shields line from damage caused by ultraviolet light exposure
